

➤ **Marketplace Demo Registration:**

- The issue is the first time I clicked to register after accept terms and conditions the model state returned error with password confirmation is not matched error message but kindly be note that it was matched and passed from data annotation front end validation. I have entered the password again and it has been redirect to error page with Role CUSTOMER does not exist error message.
I have accessed with admin permission and found that the user has been created but wasn't assigned to role.
- The issue caused by role table normalization and concurrency.

➤ **Adding Banks: Resolved with changeset 955**

cannot add new bank in dashboard settings

➤ **Delete Banks: Resolved with changeset 955**

➤ **Edit bank info: Resolved with changeset 955**
